MiCloud Connect for Remote Workers

The COVID-19 pandemic has forced many businesses to identify ways for their workers to stay productive from home. With MiCloud Connect, workers can make and receive calls, create and attend virtual meetings and stay up to date with chat and business SMS texting.

Built on Google Cloud, MiCloud Connect features the reliability and security businesses need in times of uncertainty. With our cloud-based software, employees can quickly transition to remote work using their existing devices, no additional hardware needed.

Here is a glimpse of what MiCloud Connect has to offer:

- An all-in-one solution, no need to mix and match vendors
- Flexible phone options, including softphone, web dialers and Chrome plug-ins
- IP phones that can be easily configured to work remotely
- Mobile applications for on-the-go communications
- Security, with HIPAA and SOC-2 compliancy and built-in VPN

For more information and additional support with current promotional offerings, please reach out to your Account Representative or contact Business_Development@GoBSB.com or [click here](#)

MiCloud Connect + Teamwork

MiCloud Connect is a full-featured communications and collaboration solution that empowers users to work more efficiently and productively no matter their location.

Here's what's included with MiCloud Connect:

- Softphone client for work anywhere
- Mobile applications to call and collaborate on the go
- Video, web and audio conferencing
- Collaboration software, Mitel Teamwork, that cross-launches directly from the Connect client
- Remote working tools, such as call forwarding, call transfer, voicemail, extension dialing and more
- Chrome browser extension for complete call control & optional G Suite integration
- A dedicated customer success manager to answer questions and maximize usage

Need to get started quickly? Mitel also offers [SelfStart onboarding](#) for qualified customers, enabling customers to get onboarded in as little as 1 day.
