

2026 Tech Expo Vendors

AireSpring

AireSpring is a global managed network services provider delivering connectivity, cybersecurity, managed IT services, and AI-powered network management solutions to enterprises worldwide. AireSpring supports organizations operating across single-site, multi-location, and global environments through a fully integrated portfolio of managed network and communications solutions

Algo

Algo designs and manufactures IP audio and video communication endpoints, including speakers, intercoms, paging adapters, visual displays, and alerters for commercial environments. Their devices integrate with leading unified communications and mass notification platforms to enable high-quality voice paging, alerting, and secure door entry. Algo's portfolio is SIP-compliant, proven compatible with over 60 UC platforms, and known for easy deployment and reliability. Organizations worldwide trust Algo for scalable, durable solutions in critical communications.

altafiber

altafiber, formerly Cincinnati Bell, is a regional provider of 100% fiber-optic Internet, landline telephone, and IPTV services throughout Greater Cincinnati and select markets. Their network delivers fast, symmetrical internet speeds for residential and business customers, along with enterprise IT and cloud services. Altafiber emphasizes reliability, future-proof connectivity, and elevated customer experience. They also support community initiatives and technological innovation in their service areas.

American Eagle Managed Cloud Services (AEMCS)

AEMCS delivers application-centric managed cloud services, focusing on optimizing performance, security, and cost at the application layer rather than just the infrastructure. Their team provides 24/7 monitoring, DevOps support, and continuous optimization across AWS, Azure, hybrid, and private cloud environments. AEMCS solutions include custom backup and disaster recovery, compliance-ready hosting, and advanced application management for complex digital platforms. Backed by 30+ years of experience, AEMCS offers single-partner accountability and strategic guidance to help businesses scale efficiently.

2026 Tech Expo Vendors

Brightmetric

Brightmetrics provides an analytics platform for contact center and unified communications systems such as Mitel, RingCentral, and Genesys Cloud. Their solution transforms complex data into actionable insights through real-time monitoring, customizable dashboards, and historical reporting. Brightmetrics enables organizations to track agent productivity, customer experience, and operational trends. Businesses benefit from simplified decision-making, quick setup, and improved performance.

Cato Networks

Cato Networks delivers secure, high-performance networking through its cloud-based SASE platform, converging SD-WAN and network security in one simplified solution. Their platform connects offices, remote users, and cloud resources with global reach and built-in threat protection. Cato streamlines IT operations by unifying connectivity and security management, reducing complexity and costs. Organizations rely on Cato for reliable, scalable, and secure access to business applications worldwide.

Clear Rate Communications

Clear Rate Communications provides voice, internet, and managed network solutions tailored for businesses of all sizes. Their services include high-speed fiber internet, cloud-based phone systems, SD-WAN, and dedicated connectivity, all supported by around-the-clock customer care. Clear Rate helps organizations increase reliability and security while simplifying communications infrastructure. Businesses choose Clear Rate for flexible, scalable solutions and responsive local support.

Cloud9

Cloud9 offers a managed private cloud platform powered exclusively by Mitel technology for unified communications and contact center services. Cloud9 features AI capabilities such as chatbots, automated workflows, and intelligent routing to enhance customer engagement. The platform is hosted in geo-redundant data centers with 24/7 U.S.-based support and includes carrier services, SD-WAN, and e911 integration. As a Mitel Platinum and Exclusive Partner, Cloud9 delivers proven expertise and turnkey solutions for modern business communications.

2026 Tech Expo Vendors

Comcast Business

Comcast Business provides advanced connectivity and network solutions for businesses of all sizes, supported by one of the nation's largest fiber-powered networks. Their offerings include high-speed internet, Ethernet, managed connectivity, WiFi, SD-WAN, and cybersecurity services designed to keep operations running smoothly across multiple locations. Comcast Business also delivers managed security, backup connectivity, and IT deployment services, helping companies improve performance and protect against digital threats. With 24/7 support and scalable solutions, they enable organizations to enhance efficiency and business continuity.

Dialpad

Dialpad is an AI-powered, unified communications platform that combines UCaaS and CCaaS into a single, seamless solution. Businesses can handle calling, video meetings, team messaging, and contact center operations all in one app, with built-in features like real-time transcription, sentiment analysis, and automated call summaries. Dialpad Meeting Rooms enable easy collaboration, while advanced integrations and browser-based access make it simple to use from anywhere. With enterprise-grade security and 24/7 global support, Dialpad streamlines internal and customer communications on a flexible cloud platform.

Expedient

Expedient delivers cloud computing, data center infrastructure, and managed services for businesses requiring secure, scalable IT solutions. Their offerings include hybrid cloud platforms, disaster recovery, and artificial intelligence integration, allowing clients to focus on core business priorities. Expedient leverages interconnected data centers and Infrastructure as a Service (IaaS) to ensure availability and performance. Organizations partner with Expedient for expert support and flexible, future-ready technology.

Extreme Networks

Extreme Networks delivers cloud-driven networking solutions that provide secure, scalable connectivity across wired and wireless environments. Their platform offers centralized management, automation, and real-time analytics for simplified IT operations. Businesses rely on Extreme for high-performance networks that support digital transformation and evolving business needs.

2026 Tech Expo Vendors

Intermedia (Elevate Cloud, Private Label)

Intermedia Elevate is a unified communications platform that brings together business phone, video meetings, chat, file sharing, and contact center tools in a single cloud-based solution. The platform is designed for reliability and flexibility, with features like cloud PBX, analytics, conferencing, and CRM integration. Intermedia offers 99.999% uptime and 24/7 customer support, making it a trustworthy choice for seamless communications. Elevate is private-label ready and easy to manage across all devices.

Lumen

Lumen delivers secure networking, edge cloud infrastructure, and AI-ready connectivity solutions powered by a global fiber network. Their services include enterprise broadband, Ethernet, SD-WAN, colocation, and cybersecurity designed for high-speed, low-latency performance. Lumen supports businesses with scalable connectivity, on-demand bandwidth, and up to 99.99% availability, enabling seamless hybrid and multicloud operations. With one of the world's largest interconnected networks and 24/7 support, Lumen provides reliable infrastructure for digital transformation.

Meter

Meter provides full-stack enterprise network infrastructure, combining custom hardware, intuitive software, and managed operations for wired, wireless, and cellular connectivity. Their integrated approach offers high-performance firewalls, switches, access points, cellular gateways, and PDUs—all optimized for reliability, security, and scalability. Meter's software-driven platform allows deep network visibility, centralized control, and easy multisite management for thousands of locations or devices. Companies of any size can leverage Meter for streamlined design, deployment, and lifecycle management of their business networks.

Mitel

Mitel is a global unified communications leader, providing enterprise-grade voice, video, chat, and contact center solutions. Their flexible deployment options include cloud, hybrid, and on-premises platforms built on an open communications framework. Mitel integrates AI-powered features, analytics, and industry-specific tools to support collaboration and business continuity. The company serves over 70 million users worldwide, offering secure, resilient communications for organizations of all sizes.

2026 Tech Expo Vendors

Momentum Telecom

Momentum Telecom delivers global connectivity, unified communications, and managed network services designed to keep businesses connected, secure, and scalable. Their solutions include high-speed internet, SD-WAN, SASE security, Microsoft Teams Phone integration, UCaaS, contact center platforms, and POTS replacement. Momentum provides comprehensive collaboration tools, AI-powered messaging, compliance-ready faxing, and zero-click disaster recovery for Microsoft Teams. With over 20 years of experience and access to 500+ carriers worldwide, Momentum offers tailored solutions and expert support.

RingCentral

RingCentral provides unified communications and contact center solutions that combine voice, video, messaging, SMS, and omnichannel customer interactions on one AI-powered cloud platform. Their RingEX and RingCX services enable efficient collaboration and customer service, supported by real-time analytics and integrations with leading CRMs. With 99.999% uptime, global reach, enterprise security, and 24/7 support, RingCentral streamlines communications for businesses of all sizes. Native AI features deliver transcription, call summaries, and actionable insights.

Sangoma

Sangoma provides comprehensive telecommunications solutions, including POTS replacement, SIP trunking, FaxStation, and network management services for businesses transitioning to modern IP-based communications. Their products enable organizations to eliminate legacy infrastructure while maintaining reliable voice, fax, and connectivity. Sangoma also owns the former Star2Star platform, supporting existing customers with continued service and integration. With flexible deployment options and 24/7 support, Sangoma helps businesses modernize their networks while reducing costs and complexity.

SilverSky

SilverSky specializes in managed cybersecurity services, focusing on Threat Detection and Response (MxDR) for organizations of all sizes. Their solutions combine advanced analytics, skilled security analysts, and 24/7 monitoring to defend against evolving cyber threats. SilverSky provides compliance assessments, vulnerability management, penetration testing, and CISO advisory services. Their clients benefit from military-grade behavioral tracking and rapid, human-enhanced responses.

2026 Tech Expo Vendors

Strictli

Strictli provides affordable technology solutions for individuals and businesses, specializing in buying, selling, and repairing a wide range of devices—including phones, tablets, laptops, and game consoles. Their services offer quick device trade-ins, competitive buyback programs, and comprehensive repair options. Strictli also supports organizations in reducing e-waste through eco-friendly recycling and refurbishment of old tech. Whether upgrading, recycling, or fixing devices, Strictli delivers an easy, affordable, and sustainable tech experience.

TNS

TNS specializes in trusted communications, offering advanced call branding and telephone number reputation monitoring for enterprises and carriers worldwide. Their solutions include branded calling, spoof protection, and real-time tracking to increase call answer rates and protect against fraud. TNS delivers these services through secure, globally managed network infrastructure, enabling organizations to enhance customer trust and engagement. With 24/7/365 support and decades of experience, TNS helps businesses maintain secure and effective voice communications.

Zayo

Zayo provides enterprise-grade fiber optic, transport, and connectivity solutions across an extensive North American and global network. Their services include dark fiber, wavelengths, private networks, dedicated internet, SD-WAN, and colocation, supporting high-bandwidth, low-latency applications. Zayo's network connects over 1,900 data centers with 240,000+ route miles of fiber. Businesses choose Zayo for secure, scalable infrastructure and reliable performance.

Zoom

Zoom delivers an AI-first unified communications platform that integrates UCaaS and CCaaS in a single app. Their services include Zoom Meetings, Zoom Phone, Zoom Contact Center, Zoom Rooms, team chat, webinars, and whiteboard collaboration—all designed to work seamlessly across desktop, mobile, browser, and conference room devices. Zoom Contact Center is video-optimized and supports omnichannel customer interactions including voice, video, SMS, and webchat with intelligent routing. With enterprise-grade reliability, security, and scalability, Zoom enables organizations to streamline collaboration and customer engagement.
